

CARDIAC CARE

Residents with acute or ongoing heart-related issues, including individuals recovering from a heart attack or congestive heart failure (CHF) exacerbation, receive the highest levels of care at Senior Care Centers. Our compassionate and skilled caregivers work with each resident and his or her physicians to facilitate a speedy return to prior activities and to the highest possible level of independence. In addition, Senior Care Centers' supportive **Cardiac Care** team provides guidance in modifying behaviors that may increase risks for a reoccurrence of symptoms. We want patients and residents with cardiac challenges to live as comfortably and worry-free as possible, while guarding him or her against future cardiac complications.

- ⌚ Personalized rehabilitation and treatment plans
- ⌚ Holter and cardiac event monitoring post cardiac event
- ⌚ Real-time cardiac telemetry (available in select locations)
- ⌚ Each patient is transitioned as quickly possible to their next level of care
- ⌚ Help with reducing symptoms and preventing a hospital readmission
- ⌚ Medication management in coordination with licensed nurses and physician support
- ⌚ 24-hour skilled nursing and medical support services

The heart of
nursing care is here.
